Flexiti Financial

Flexiti has reimagined point-of-sale (POS) consumer financing to drive sales for retailers in-store and online, becoming one of Canada's leading private label credit card issuers. Through our award-winning platform, we deliver a POS financing experience across any device that is customer-centric, simple and intuitive. Without the need to integrate into existing POS systems, retail partners can easily offer the same fast and paperless financing solution across all retail locations and sales channels to increase revenue and build loyalty through repeat purchases. For more information, visit www.flexiti.com.

Application Architect

Flexiti Financial is looking for an Application Architect to join its IT team. Supporting the CIO, the Application Architect will be responsible for the design and creation of new applications as well as improving existing applications, run software tests, develop product prototypes and create technical documents relating to application development.

Responsibilities

- Deploy, maintain, and troubleshoot core business applications, including application servers, associated hardware, endpoints, and databases
- Meet and coordinate with internal and external stakeholders to establish project scope, system goals, and requirements
- Develop, analyze, prioritize, and organize requirement specifications, data mapping, diagrams, and flowcharts for developers and testers to follow
- Translate non-technical requirements into clear, highly technical specifications and vice versa
- Produce all low-level design for projects and the necessary documentation (i.e. UML class diagrams, table design, flows, program specs, etc.)
- Manage the set-up and configuration of systems
- Define and coordinate the execution of testing procedures, and develop test cases to serve the overall quality assurance process
- Provide documentation of all processes and training as needed
- Perform design and code reviews as needed
- Develop and implement maintenance procedures, monitor systems health, gather system statistics, and troubleshoot reported errors and alarms
- Perform design, implementation, and upgrades of information systems to meet the business and user needs
- Implement best practices for scalability, supportability, ease of maintenance, and system performance

Qualifications

- Bachelor's degree in computer science or information technology

- 3-5 years experience working with information technologies and systems analysis, ideally in the financial technology industry
- Expertise in the design, development and deployment of enterprise-level N-tier architecture in a Microsoft .NET Framework or Java Enterprise Edition platform
- Strong computer, hardware, software, and analytical skills
- Proven ability to assess business needs and translate them into relevant solutions
- Proven ability to assess risk and implement mitigation plans
- Proven experience in producing all low-level design for projects and the necessary documentation (i.e. UML class diagrams, table design, flows, program specs, etc.)
- Strong understanding and knowledge of the principles and practices associated with database maintenance and administration
- Experience installing, configuring, documenting, testing, training, and implementing new applications and systems
- Working knowledge of a wide variety of programming languages (specifically, experience in C# and JavaScript, working with RESTful APIs and with relational databases (SQL)
- Excellent analytical skills
- Experience in an Agile development environment

What We Offer

Below are just a few reasons why people love working here:

- An opportunity to be a part of an award winning and fast growing company
- An innovative culture that promotes autonomy and flexibility
- A dynamic team and working environment that provides ongoing support
- Competitive compensation package commensurate to experience

Flexiti embraces diversity. We are committed to building a team that represents a variety of backgrounds, perspectives, and skills. All qualified applicants will receive consideration without regard to race, ancestry, place of origin, colour, ethnic origin, citizenship, creed, sex, sexual orientation, disability, age, marital status, or family status. If you require disability-related accommodation during the application or interview process, simply let us know and we'll work with you to ensure you have a positive experience.
